

I have been listening to XM Sttellite Radio for some time now; it is a service I pay for and enjoy and I find the traffic and weather very useful. The biggest advantage is that it's always there - I don't have to search through other stations and wade through commercials. Traffic and weather are only useful on normal radio at certain times of the day, XM is useful all the time. I urge you reject NAB petition 04-160.
